

# Gerard Strecker

Software Engineer | Full-stack Developer

## PROFILE

I'm Gerard, a software engineer specializing in full stack web development. I offer a versatile and adaptable skill set including SPAs, UI/UX, researching emerging technologies and documentation. I focus on front end development using React.js but am tech agnostic and willing to learn new technologies. My goal is to find a long-term position on a team with an inclusive environment that fosters growth as a developer

## EXPERIENCE

I actively maintain, review and coordinate new feature roll outs for an open-source project Git-Connected and work with small businesses to help grow their online presence through modern web applications. This Section highlights some of my most recent projects.

### Maintainer/Reviewer of a social networking application

5 months | Maintainer | Reviewer | Full-stack Developer

I currently maintain, review code and plan new features on a web application called "Git-Connected" that helps early-career software engineers quickly build a supportive network. I review code on every pull request to the GitHub repository. I actively contribute code to the project, focusing on feature development and refactoring.

TypeScript | React.js | Tailwind CSS | Node.js | Express.js | MongoDB

### Create applications for web dev agency

11 months | Develop | Design | Maintain

Design, develop, and maintain full stack web applications for small businesses, improving their web presence, user retention and application performance. Collaborated with a team of developers to build modern and responsive full-stack web applications using best practices. Maintained detailed git history for all projects and used Github in a team environment teami of developers to build modern and responsive full-stack web applications.
